

A new net bottom cage for oiled wildlife that suits rehabilitators and industry standards.

Introduction: finding ready-to-use net bottom cages for oiled wildlife that match the requirements of oiled wildlife rehabilitators has always been a challenge. While the industry and governments want to be prepared, it was not always easy to find cages that could be stockpiled under challenging e.g., humid/salty conditions and that were easy to deploy. This new type of cage was thoroughly tested and approved by EUROWA and GOWRS organisations.

Easy and safe to store:

- ✓ Industrial pallet with sleeve and lid
- ✓ Easy to restore after usage

User friendly:

- ✓ Very easy to set-up and move by 1 person
- ✓ Only 6,7kg; >50% lighter than wood
- ✓ Including document holders
- ✓ Hight of the net bottom can be adjusted in function of ergonomy

Bio security:

- ✓ Easy to clean and disinfect
- ✓ Cover prevents aspergillose

Recycling

- ✓ Cage is made of black regenerated PE

The advantages:

- ✓ Tested and recommended by experienced oiled wildlife experts from Europe
- ✓ Easy to clean and disinfect thanks to smooth sides, rounded edges, no places where dirt can pile up
- ✓ Very lightweight and movable by just one person: only 6,7kg
- ✓ A lot of attention for sustainability through the use of recycled and reusable materials: sheet made of recycled PP, frame from PVC, stainless steel screws, cover made of PE.

Content:

- ❑ 1 set netbottom cage consist of:
 - 1 open folding sleeve including handles and supports
 - 1 net bottom frame with stainless steel screws
 - 1 net knotless
 - 1 cover sheet anti aspergillus
 - 2 document holders
- ❑ 1 pallet box consists of 15 sets of net bottom cages
 - Including 4 extra netframes and nets
- ❑ Pallet box includes:
 - thermoplastic(PP) pallet
 - thermoplastic(PE) sleeve
 - thermoplastic(PP) lid
